ECN Topic: New material of housing and power switch are introduced to Winmate's PPCs

INTRODUCTION

To provide a better quality of Panel PC, we would like to inform you that about our Product changes on the introduction of the new treatment material of housing and also the new type of power switch.

Product Applied

The revision applies for all Intel® based and AMD based Panel PC models with the mechanical variations of Open Frame, Panel Mount (5mm front bezel), IP65 (10mm front bezel) series except the Customized models.

DETAILS:

1. We will use a better plating material for the Mounting Plate and Rear Cover of the panel pc housing. This plating treatment will be performed after the metal is cut. It will make the housing more resistant to corrosion.
2. A new Membrane type of power switch will also be implemented for all Panel PC. It will provide user a better touch feeling and easy-to-use power on/off.

The below pictures show the example of how the new unit differ from current one.

This change will not impact the performance. Model Numbers and Type Approvals will remain unchanged.

Before:

After:

Will be effective from 15th April 2007.
